

# Dynamat Heavy Duty Heat & Noise Barrier

## Dynamat Xtreme

Dynamat Xtreme is the highest efficiency sound deadening material available and the most effective product for stopping noise and vibration. Xtreme should be used on any and all interior sheet metal or fiberglass of your vehicle. The aluminum constraining layer is very moldable and conforms easily to all interior surfaces. The extra sticky patented butyl layer is formulated with vector chemistry for the most amazing energy conversion capabilities ever. Use it on doors, floors, roofs, hoods and trunks for a really quiet, cool and incredibly solid ride.

## Dynaliner

The all new Dynaliner is the perfect light-weight super insulator to use on top of dynamat. This durable crush and tear resistant material has the highest heat blocking properties available in a single layer synthetic foam type material. Dynaliner isn't affected by oil and does not absorb water. Dynaliner provides acoustic absorption and excellent thermal insulation for roof, firewall, floor, quarter panels, doors and even as a hoodliner. Available in 1/8", 1/4" and 1/2" Thickness.

## Dynapad

Looking for extra cool & quiet?

Dynapad is a four part composite barriers providing maximum acoustical attenuation and excellent thermal insulation.

This heavier material utilize "dissimilar layer insulating" technology that solves two of the most difficult automotive problems; exhaust system heat and low frequency noise. Use primarily on the floor and firewall for cool comfort.
