

# Stainless Steel Beaded Channels

Stainless steel bead provides extra trim and increases side wall rigidity. Close packed wool pile fabric lining gives heavy cushion and weather tight fit with maximum friction to glass. Extra long life assured by galvanizing or super-thick, rubber covered steel core. Where used the rubber covered steel core gives utmost protection against corrosion, noise and rattles.

## Y528

Please note:

The information supplied on channels, belt weatherstrips and division bars is taken from numerous manufactures catalogs and the accuracy cannot be assured. It is suggested that you check your existing channels for exact duplication. If you cannot find the channel that you need please send us a sample or a drawing and we will try to match it against our large stock.
